

Pandoc Markdown Example

- This is a heading
 - This is a heading 2
 - * heading 3
 - heading 4
- Version Control??

This is a heading

The headings appear as sections in the table of content.

This is a heading 2

This is a paragraph.

markdown text can have *italics*, **bold**, `monospace` and ~~strikethrough~~ in it. underline text isn't a thing in markdown tho, but u can do it in LaTeX, and in HTML too, LaTeX has dunderline text as well.

This is a new paragraph, separated from the previous by two newlines.

In order to have a line break in a paragraph, you need to end the line before it with two or three spaces.

The table of contents is automatically generated by vscode from the headings.

1. This is a list
2. It numbers itself
3. automagically

this	is	a table
the	first	row
the	second	one

- unnumbered
- lists
- are a thing
- too

BibTex references can be added in pandoc, and zotero references can be saved as BibTex. (Hasselquist et al. 2022)

heading 3

Headings > 3 are inlined into paragraphs

heading 4 Like this

Version Control??

Yep! You can use git to version control your markdown files, and vscode has a built in git interface. You can also use github to host your markdown files, kinda as a backup and a way to share them with others.
